

This listing of claims will replace all prior versions,
and listings, of claims in the application:

1 Claims 1-2 (canceled)

1 Claim 3 (currently amended): ~~The method of claim 1, A~~
2 method for generating a digital video stream, comprising:
3 loading user preferences corresponding to a manner
4 in which the digital video stream is to be configured,
5 wherein the user preferences includes include a plurality
6 of time zones in which various parts of a system that is
7 to be tested with the digital video stream may be
8 simulated to operate in;
9 identifying media required by a media generator to
10 satisfy the user preferences;
11 loading said media;
12 using said media to generate intermediate digital
13 content based on the user preferences;
14 transferring the intermediate digital content to an
15 encoder; and
16 encoding said intermediate digital content into said
17 digital video stream.

Claims 4-12 (canceled)

1 Claim 13 (currently amended) ~~The computer-readable medium~~
2 ~~of claim 11, A computer-readable medium carrying one or~~
3 more sequences of instructions for presenting dynamic
4 content from a server to a client, wherein execution of
5 the one or more sequences of instructions by one or more
6 processors causes the one or more processors to perform
7 the steps of: loading user preferences corresponding to a

8 manner in which the digital video stream is to be
9 configured, wherein the user preferences ~~includes~~ include
10 a plurality of time zones in which various parts of a
11 system that is to be tested with the digital video stream
12 may be simulated to operate in; identifying media
13 required by a media generator to satisfy the user
14 preferences; loading said media; generating intermediate
15 digital content based on the user preferences;
16 transferring the intermediate digital content to an
17 encoder; and encoding same intermediate digital content
18 into said digital video stream.

1 Claims 14-22 (canceled)

1 Claim 23 (currently amended): ~~The apparatus of claim 21,~~
2 A system for generating digital content, comprising: a
3 means for loading user preferences corresponding to a
4 manner in which the digital video stream is to be
5 configured, wherein the user preferences ~~include~~ includes
6 a plurality of time zones in which various parts of a
7 system that is to be tested with the digital video stream
8 may be simulated to operate in; a means for identifying
9 media required by a media generator to satisfy the user
10 preferences; a means for loading said media; a means for
11 generating said digital content based upon the user
12 preferences; and a means for encoding said digital
13 content based upon the user preferences.

1 Claim 24-32 (canceled)
